

payables

Accounts Payable is fundamental to good vendor relations. *payables* streamlines the administrative and cost challenges.

***payables* makes it easy and cost effective.**

One of the challenges facing organizations today is finding the best e-business solution to meet goals for greater operational efficiencies. *payables*, American Software's new e-application, streamlines administration while accurately processing your Accounts Payable invoices. Using the Internet or your company's intranet, *payables* provides a secure, self-service solution for your employees. Anytime, anywhere.

Streamline your internal processes.

payables works seamlessly with your existing ERP or legacy systems to provide all the features of a traditional Accounts Payable solution. Not only that, it can even supplement your existing system with tighter controls. With this powerful, paperless method of disbursement, you can let reviewers view invoices and expense them on the same web page. Bottom line: *payables* makes it easy to streamline administrative processes across your entire enterprise, resulting in satisfied employees and vendors.
